

UltraCal® XS

Calcium Hydroxide Paste

Description:
UltraCal® XS is an aqueous, 12.5 pH, syringeable, radiopaque, calcium hydroxide paste. Use it as an endodontic treatment dressing. Superior delivery control of UltraCal XS is obtained with a NaviTip™ attached.

Indications:

UltraCal XS is to be used as per literature teachings for pulp capping, lining pulpotomies, or as a temporary dressing as per apexification procedures in endodontics.

Procedure:

Following instrumentation, remove luer lock cap from UltraCal XS syringe and attach a NaviTip. Deliver UltraCal XS short of the apex while slowly withdrawing tip (Fig. 1).

Note: Use Ultra-Blend® plus™ for pulp capping procedure.

Precautions:

- Material is basic. Use carefully and rinse with lots of water if material is inadvertently discharged in an undesired area.
- Tips are disposable.
- Deliver with NaviTip, staying at least 2mm shy of the apex, always keeping the delivery tip loose in the canal. Don't deliver with plastic tips which can occlude tight in the canal (example Capillary™ tips).
- Prefilled syringes are multi-dosage.
- Clean and disinfect between applications as appropriate.
- We highly recommend using Ultradent® Syringe Covers sealed with the Impulse Sealer to provide a protective barrier against cross-contamination.

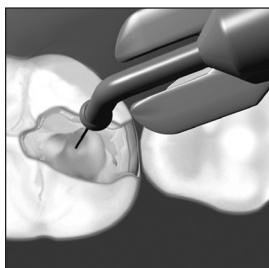

Fig. 1 Following initial instrumentation, canal is filled with UltraCal XS paste.

EN Following instrumentation, fill canal from apical portion of root outward. Stay at least 2mm shy of apex.

DE Nach der Instrumentierung füllen Sie den Kanal von apikal an aufwärts. Bleiben Sie mindestens 2 mm vom Apex entfernt.

FR Après l'instrumentation, remplir le canal de la partie apicale vers la partie coronaire. Rester à 2 mm de l'apex.

NL Vul na de instrumentatie het kanaal vanaf de apex naar coronaal. Blijf minstens 2mm voor de apex.

IT Dopo la strumentazione, riempire il canale iniziando dalla porzione apicale e procedere verso l'alto. Mantenersi ad almeno 2mm dall'apice.

ES Despues de la instrumentación, llene el conducto desde la porción apical hacia afuera. Manténgase por lo menos 2mm al borde del ápice.

PT Após instrumentação, obturar o canal do apex para cima. Manter a 2mm de distância do apex.

SV Efter rotkanalen resats, fyll kanalen från den apikala delen av rotten och utåt. Stanna med kanylen minst 2mm från apex (applicera med lått tryck och drag saktat upp kanylen samtidigt).

DA Efter mekanisk udrensning fyldes rotkanalen fra apex mod tandens krone. Afstanden til apex skal være mindst 2mm.

EN Canal prior to treatment on left, 5 months after application of UltraCal XS on right. UltraCal still in canals.

DE Links: Kanal vor der Behandlung; rechts: 5 Monate nach UltraCal XS-Applikation. UltraCal XS ist immer noch im Kanal vorhanden.

FR Canal avant le traitement (à gauche) et 5 mois après l'application de l'UltraCal XS (à droite). UltraCal est encore dans le canal.

NL Links: kanaal voor behandeling. Rechts: 5 maanden na applicatie van UltraCal XS. UltraCal is nog steeds in het kanaal aanwezig.

IT A destra. Canale prima del trattamento. A sinistra. Situazione a 5 mesi dall'applicazione di UltraCal XS. UltraCal è ancora nel canale.

ES La figura a la izquierda muestra el conducto antes del tratamiento. La figura a la derecha muestra el conducto 5 meses después de la aplicación de UltraCal XS. UltraCal aún puede verse en el conducto.

PT Canal antes da obturação à esquerda, 5 meses após a aplicação do UltraCal XS à direita. UltraCal ainda no canal.

SV Tidigare rotkanalsbehandling till vänster, 5 månader efter applicering av UltraCal XS till höger. UltraCal finns fortfarande i kanalerna.

DA Kanalen inden behandling til venstre, 5 måneder efter fyldning med UltraCal XS til højre. UltraCal XS er stadig i kanalen.

Intrumentatiota seuraten, täytä kanava apikaalisesta osasta ylös päin. Etäisyys apexiin tulee olla vähintään 2 mm.

EN- Täytä tämän chymikomittjaniksi ettei seurauksia, ymmärtävät sen oljukko soveltuu aina toiselle akroosille ja tieniin ja päässä. Na muineet toulakäistöön 2mm konttuteeraa aina toiselle akroosille ja tieniin.

RU- После обработки канала заполните его от апикальной части кнаружи. Отступите от верхушки не менее 2 мм

PL- Po opracowaniu kanału wypełnić go od części szczytowej korzenia do ujścia. Zachować odległość co najmniej 2 mm od wierzchołka korzenia.

TK- Cihazla çalıştırıldıktan sonra kanalı, kökün apikal bölümünden dışarıya doğru doldurun. Apeksen en az 2mm uzakta kalın.

RU- Только для профессионального применения.

PL- Tylko do profesjonalnego użycia.

TR- Sadece profesyonel kullanım için.

KO- 전문가만 사용하세요.

ZH- 只供专业人员使用。

TH- สำหรับแพทย์และนักฟอกฟันเท่านั้น

General Precautions:

1. For Professional use only.

2. Develop the restorations, and MSDS before beginning treatment. Use only as directed.

3. Avoid skin exposure.

4. Avoid skin exposure to resin.

5. Isolate strong chemicals to area of treatment.

6. Confirm that patient has no known allergies to treatment materials.

7. If patient flows blood, stop the flow and tip before using introrally.

8. Never force syringe plungers.

9. Use UltraGaci® Syringes Covers and/or clean and disinfected syringes between patients.

10. Use standard curing lights with all light polymerized/activated materials.

Allgemeine Vorsichtshinweise:

1. Nur für Berufspraktiker zulässig/verboten.

2. Lassen Sie die Gebrauchsanweisung und die Materialien sorgfältig, bevor Sie die Behandlung beginnen. Verwenden Sie die Materialien nur gemäß Vorschrift.

3. Beschreiben Sie den Einfluss stark wirkender Agenten auf das Behandlungsbegleit.

6. Fragen Sie den Patient nach bekannten Allergien auf die zur Behandlung verwendeten Materialien.

7. Trifft Ihnen die Fließende Blutung und die Blutung bei der Anwendung vor?

8. Nie drücken Sie die Spritze auf dem Spritzenkopf.

9. Verwenden Sie UltraGaci-Spritzenabdeckungen und reinigen und desinfizieren Sie die Spritzen nach jedem Patienten.

10. Verwenden Sie Materialien, die durch Licht zu polymersieren bzw. zu aktivieren sind, die üblichen Polymerisationslampen.

Précautions générales:

1. Exclusivement réservé à l'usage professionnel.

2. Développez les restaurations, et la notice de sécurité avant le traitement. Utiliser uniquement selon les instructions.

3. Évitez l'exposition de la peau aux produits utilisés.

4. Évitez le contact des résines avec la peau.

5. Limiter l'application des produits aux seules zones de traitement.

6. Assurez-vous que le patient ne présente aucune allergie aux produits utilisés lors du traitement.

7. Si le patient présente une hémorragie, arrêter le flux et renverser.

8. Ne jamais forcer sur le piston des seringues.

9. Utiliser couvercles souffrages UltraGaci® et/ou nettoyer et désinfecter les seringues après utilisation.

10. Utiliser une lampe à photopolymériser standard avec les matériaux photopolymérisables ou photoactifs.
